

UX Case Study Report – Zomato App

1. Introduction

Zomato is one of India's leading food delivery and restaurant discovery applications. This case study analyzes the user journey, strengths, weaknesses, and potential UX improvements.

2. Target Users

- College students ordering budget meals
- Office workers ordering during busy hours
- Families ordering dinner online

3. User Journey Analysis

- Open the app and browse homepage
- Search for desired food item
- Select restaurant and view menu
- Add items to cart
- Proceed to checkout and payment
- Track delivery in real time

4. UX Strengths

- Clean and visually appealing interface
- Easy navigation and search functionality
- Real-time delivery tracking
- Personalized restaurant recommendations

5. UX Weaknesses

- Homepage feels crowded with banners
- Filter system is difficult for new users
- Extra charges shown late during checkout
- Delivery estimates can feel inconsistent

6. UX Principles Applied

- Simplicity
- Consistency
- Reduced cognitive load
- Better information hierarchy
- Visibility of system status

7. Suggested Improvements

Improvement 1 – Simplified Homepage

Reduce promotional clutter and prioritize search, recent orders, and restaurant discovery.

Cleaner Homepage

Improvement 2 – Smarter Filter Design

Use collapsible filters and quick filter chips for faster restaurant discovery.

Improved Filters

Improvement 3 – Transparent Pricing

Display delivery fees and taxes earlier to improve trust and reduce cart abandonment.

Transparent Cart

8. Conclusion

Zomato provides a strong user experience overall, but simplifying the homepage, improving filters, and increasing pricing transparency can significantly enhance usability and customer satisfaction.
